

One hour once a month
with one of the RESIST AI experts ONLINE

PROF. DR. YANG LI

PROF. DR. JENS BOSSE

**PROF. DR. MARCO
GALARDINI**

MEET THE AI EXPERTS

Every month, RESIST researchers can book a consultation session with one of our AI experts to discuss data analysis, machine learning, bioinformatics workflows, AI applications in infection research, and related challenges. Please check our webpage and the webpage of the experts for the expertise.

Turning Data into Discovery

Whether you are planning a project, struggling with data interpretation, exploring AI tools, or looking for computational support — our experts are available for consultation and discussion.

Topics may include:

- Artificial Intelligence in infection research
- Machine learning approaches
- Bioinformatics and omics analysis
- Data visualization and interpretation
- Computational workflows and tools
- Experimental design support

Take your chance!
